MicroMD® EMR for Internal Medicine and Family Practice

Coordinating care among specialists. The increasing frequency of patients with multiple chronic conditions. Pending incentives for e-prescribing. Internal medicine physicians and family practitioners face a range of pressures that Henry Schein Medical Systems MicroMD EMR (Electronic Medical Records) is designed to overcome. MicroMD EMR offers multiple, highly flexible options for charting encounter data, adds structure to and streamlines practice workflow, and helps physicians access the information that helps them strengthen patient relationships.

Prevention Programs

Track results and manage screening and prevention programs; manage immunization programs; at a glance, monitor progress toward goals associated with virtually any diagnosis or risk factor.

Patient Education

Use diagrams, graphical views, and printed handouts to help patients better understand their health status and chart their progress.

Medication Information

Quickly review patient charts to see prescriptions, long-term medications and other medications, accurately differentiating among acute care meds and chronic meds.

ePrescribing

Quickly write and route prescriptions directly to pharmacies so that medications are ready when patients arrive; save hours of staff time by streamlining prescription and refill management.

Family Members and Family Tree

Manage services to families with direct cross-links to the charts of family members; use the graphical family tree tool to get a broad family history or filter the view to see only conditions you deem most relevant.

Confidential Information

Store any kind of personal, private or sensitive information as password-protected comments in the patient's chart.
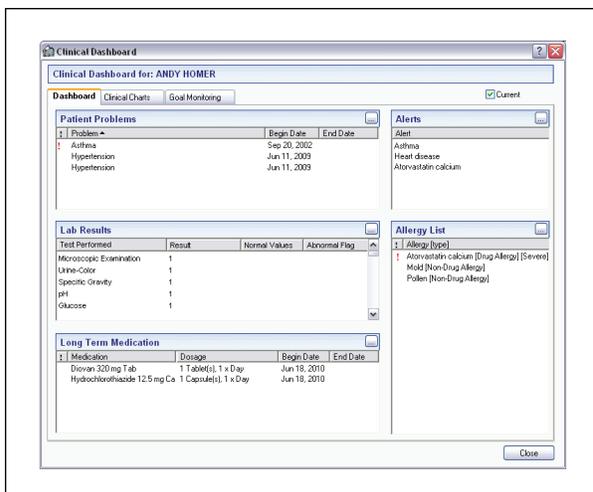

Referral Management

Efficiently generate referrals and supply specialists with relevant medical information; easily track incoming and outgoing referrals; monitor the status of pending referrals.

Interfaces with Lab Services, Hospitals and Cardiopulmonary Devices

Access in-house and reference lab results from within the electronic chart; manage all diagnostic test results and images for reference at the point of care or 24-7 remote access; capture vital signs and other data directly from a wide range of devices, including electrocardiographs, Holter systems and spirometers.

Custom Chart Summary and Clinical Dashboard

Customize the chart summary to present your most relevant data elements, such as problem list, lab results, long-term medications, and many more; access the clinical dashboard for quick access to a comprehensive clinical profile and clinical graphs that track measures such as blood pressure, cholesterol, or weight over time.

surescripts
The Nation's E-Prescription Network

solution provider
