

MicroMD® EMR for Pediatrics

The flexible documentation features of MicroMD EMR help pediatricians manage acute illnesses, chronic conditions and well visits more efficiently. A range of capabilities specifically target the specific needs of healthcare professionals working with infants and children.

Automated Reminders

Ensure timely immunizations by minimizing the chance of missed appointments.

Automated Graphing and Alerts

Instantly view pediatric growth charts for quick analysis and explanation to parents; set alerts triggered by early deviations in growth rates.

Easy Data Entry

Streamline the entire process behind Denver II development testing visits.

Intuitive Forms

Select the best data capture method for each pediatrician: free-text into templates; point-and-click forms with helpful "wizards"; standard or custom SOAP templates; or speech recognition.

Preschool/Camp Forms

Save time with highly accurate automatic generation of forms required by schools, camps, sports organizations and others.

Hearing and Vision Screening

Quickly, efficiently record pediatric-specific hearing and vision screening results.
