

MicroMD® Electronic Medical Records (EMR)

Simple yet powerful solutions for Health Centers: CHCs, FQHCs and RHCs

Health centers rely on MicroMD EMR to create a paperless environment, improve workflow, enhance care delivery and boost productivity. Immediate, shared access to patient data minimizes paperwork and maximizes productivity. MicroMD EMR integrates with your practice management system to expedite care, enhance accuracy and improve reimbursement. Available as either client-server or web-based ASP software, MicroMD EMR is a scalable and flexible solution that allows you to improve efficiency, maximize growth and meet changing regulatory requirements.

ICD-10 Functionality – Simplify detailed code searches and quickly assign codes

- Efficiently document details to support specific ICD-10 codes
- Code descriptions outline specificity required

Clinical Documentation – Choose the method that works for you

- Multiple charting options, including templates, forms, Dragon® Medical speech recognition and handwriting recognition
- Fast access to entire patient histories

E&M Coding – Comprehensive, accurate E&M calculator

Health Maintenance, Alerts and Reminders – Promote healthy outcomes

- Drug interactions, allergies, immunizations and more
- Patient education and goal monitoring

e-Prescribing – Improve medication safety, enhance workflow and save time

- Two-way pharmacy communications
- Enhanced medication reconciliation
- Accommodates 5010 coding and claim checking, as well as verification of patient paid prescriptions

Patient Portal – Flexible, two-way patient-to-center communications help staff save time

- Health center landing page
- Secure login/Patient home page/Patient inbox
- Customized forms module
- Upload of CCD/CCR to share patient health records

Complete 2014 CEHRT for Meaningful Use Functionality – Helping your providers earn incentive dollars and avoid Medicare payment adjustments

Henry Schein Secure Chart Patient Portal

The Henry Schein Secure Chart Patient Portal provides patients and health center staff a web site containing a number of easy-to-use features that will save time for both patients and staff, including:

- Collecting patient form data online prior to service
- Answering patient questions
- Setting up appointments online
- Securely sending records and results to your patients
- Certified with MicroMD EMR for Complete 2014 Edition CEHRT

Meaningful Use functionality and features

MicroMD EMR incorporates meaningful use functionality that allows providers and staff tools to achieve, monitor and attest to meaningful use.

- **Stage 1 and 2 core and menu set objective features** – objective measure selection and set up, required data fields, automatic calculation of % completion and real-time attestation reporting
- **Stage 1 and 2 Clinical Quality Measure (CQM) features** – CQM measure selection and setup, required data fields, automatic calculation of % completion and real-time attestation reporting
- **Quality measures button** – an at-a-glance alert for providers to know whether a chart or encounter meets meaningful use requirements, as well as which data fields need completion
- **CDA functionality** – allows for the export of patient health records
- **Interoperable connectivity** – HL7 interfaces available for HIE lab and registry connectivity

Patient Overview and Alerts

When you first open a patient's chart, MicroMD EMR provides a quick and customizable overview of any outstanding alerts, lab results you haven't viewed, immunizations that are due and much more. Quickly access your patient's medical history, including allergies and a list of patient encounters. Patient Overview allows providers to add customized chart views, including graphs to the patient chart. From here, providers can update and review patient medical information, assess progress towards healthcare goals, and keep the patient compliant with Health Maintenance and Immunizations.

Encounter flexibility

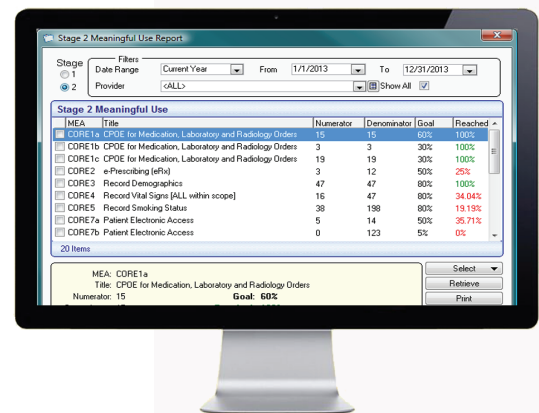

MicroMD EMR enables providers to document encounter details in a variety of ways. Patient data can be organized in the familiar "SOAP" format, promoting organized and consistent data entry. MicroMD EMR also allows the recording of encounter data in free-text format, providing flexibility of data entry. Or you can dictate patient encounters in historical, subjective and objective format. MicroMD EMR minimizes the time and effort required to complete each patient visit.

Interoperable Device and Lab connectivity

MicroMD EMR integrates with a number of labs, including LabCorp and Quest and medical and diagnostic devices from Welch Allyn, Midmark and Burdick, including ECGs, Holters and spirometers. Reduce manual data entry and save time in collection and management of physiological data. Utilize these devices to improve convenience and revenue by performing additional procedures in-office rather than referring patients.

MicroMD EMR 10.5 is a Surescripts Solution Provider and is certified for prescription benefit, history, routing and EPCS.
